

ABSTRACT OF THE DISCLOSURE

In an Internet facsimile apparatus, it is an object of the invention to provide means for notifying the user of details of a message disposition  
5 notification situation (MDN) of a transmission image. When E-mail data is sent, an MDN for E-mail to be sent is requested and communication management information of the sent E-mail is updated on the basis of a reception result of reply E-mail responsive to the MDN  
10 request.
